产品详情

窄线宽1550nm脉冲调制激光器功率可达20mW

Select Wavelength laser Diodes Specification SWLD-1550.12-20-FA SWLD with DFB LD chip, wavelength 1550.12±0.5nm, power ≥20mw,14-pin butterfly package built-in optical isolator and thermoelectric cooler,1m single-mode pigtail with 900um tight tube,FC/APC connector. Standard ITU Grid Wavelengths ; High output power(10~100mW); Low wavelength temperature coefficient; Accurate wavelength selections; High-reliability in 14-pin butterfly package; Built-in optical isolator; Customized package; Polarization Maintaining Fiber (optional)
