ultrasuede® for automotive

ultrasuede® for oem:

interior performance that matches the car itself

the superior performance of ultrasuede®, the best ultra-microfiber material available today, makes it the perfect choice for automotive interior use. it provides essential utility to the next generation of automobiles: with style, durability, and rich, textured luxury. the unique construction of ultrasuede®, as part of our environmentally responsible line of products, permits shaping to fit the designs of any automobile interior application, easily adapting to seating, overhead systems, door trim, instrumental panels—strength and good looks where you need them most. in addition, its easy maintenance is unrivaled, and its versatile styling offers innumerable options to match both the design and beauty of any interior.

ultrasuede® for aftermarket:

enhancing the beauty of your car

ultrasuede® is an american brand synonymous with elegance and durability. it is a revolutionary product featuring ultra-microfiber made with 100% recycled polyester that is made to perform effortlessly and flawlessly throughout its long life. ultrasuede® brings you all the beauty, softness, richness of texture, and the optimum quality you require. and because it can adapt to virtually any need, ultrasuede® fits newer-model vehicles—as well as vintage or antique. a member of sema, ultrasuede® is engineered and designed to restore, re-create, and re-energize the image of your car.
