买双卡通最重要的大家要看：买前必读，否则你要上当！

买双卡通最重要的大家要看：买前必读，否则你要上当！

1：a-
我们能用原装卡槽，因为我们的线路板更薄！市场很多把卡槽挖了很难看，根本是多余，设计有缺陷！

b-我们能支持3g卡，最近市场仿造都不支持3g卡,

c-我们能同时支持4及4s与i5用！我们配有专利设计的nano卡可以放4s与4里用的卡槽！

d-我们原装兼容性程序，国外很多卡都通用！

e-我们是万能双卡通，支持ios与安卓系统，并且可以给三星使用！

f-我们支持ios:6.0/6.01/6.x,山寨的用行！

2：我们是工厂直销，价格有优势！4/4s/5通用双卡通 20元不配壳及外包装，配双卡槽，配包装几专用壳35元，i4及4s专用，不配壳及包装10元，超过5k 价格8元，配壳及专用包装25元！3卡贵1元

3：我们的程序你可以对比，我们是有rsim标志的程序，你可以试那些没品牌的程序，问题一大堆！明显的山寨品，并且山寨不到家！

英文说明如下：iphone5/4s/4 dual sim adapter with caseno jailbreak needed, no software to install, works on all iphone new firmware versions this dual sim case foriphone5/4s/4 simply makes life very simple , let`s say you can happily use 2 sim cards in your iphone5/4s/4,sim bank to avoid misplacing your 2nd sim, never carry 2 phones around anymore, manage your private and business numbers. supports 2 simcards, comes with scratch proof case

most cases are designed for the sole purpose of protecting a smartphone from getting scratched. this latest case for the iphone5/4s/4 has a second function. that is to provide an area to hold a pair of sim cards allowing the iphone5/4s/4 to be used with dual sim cards rather than a single sim card.

to get the dual sim cards connected to the iphone5/4s/4 / a ribbon cable is provided that you insert in to the microsim slot. this then folds around the back of the iphone5/4s/4 to a place where the case holds them in to position.the adapter provides a way to switch between sim cards without switching the iphone5/4s/4 off which is handy for times when you want to use more data for example, or switch to a sim card that has more text messages available.lets say you have a unlocked iphone5/4s/4 and posses more than one network simcard and wish to swap the network simcards around from diffrent providers be it any reason you like.currently by phyically switching network simcards manually can get complicated and become time cumsuming and can cause damage to the iphone5/4s/4 sim gate and internal click in mechanism.you may want to be able to swap simcard many times a day as and when you need to use your other network simcard.how to set-up your dual sim adaptor_____- home ==> settings ==> phone ==> sim applications: select your desire sim card(if you don't want it to select sim card for you when the signal is low, please don't select "auto/sw)note once you've chosen to another sim card, it will have a message "no sim card installed", please wait 1 or 2 minutes, it needs aound 1 ~ 2 minutes to search, during this time, "no sim" will appear in the top right of your iphone's screen.

+ support umts/3g cards and 3g networks + stk menu+ a very simple powerful stk menu to select default number for making calls, use any of the 2 numbers to make call at any time and divert the primary number to receive calls on both numbers.

product particular introduction: 1. two numbers in one card (most practical function design). 2. special double modes function. 3. invisible number - temporary not connected function. 4. extended support to multi sim card. 5. maintain original sim card stk menu function. 6. two number auto switch on line, easily set the on line time. 7. display the on line number in screen. 8. keep call records function. 9. support gsm and 3g-usim card.

+ very simple operation, easy plug-&-play

this accessory is compatible with:

- iphone5/4s/4(firmware all versions) this is an updated firmware that supports iphone5/4s/4 without rebooting(please if your network sim card is old version then foriphone5/4s/4 you might to do air-plane mode when you switch
