产品详情

Microfine Moly & Graphite Techlube is moly and graphite in a multi-polymer bake cure resin binder that will provide a durable, dry film coating with an extremely low coefficient of friction. This dry film lubricant is intended to be applied to equipment such as but not limited to steel, aluminum, magnesium, clutches, gears, shafts and other mechanical parts which function under extreme weathering and/or operating conditions. This product is perfect for applications that require a lubricated surface where greases will not work. Microfine Moly & Graphite Techlube是一种钼和石墨，是一种多聚合物烘烤固化树脂粘合剂，可提供耐用的干膜涂层，且摩擦系数极低。
