This morning was very busy. The client from Caribbean urged me to send him the proforma invoice. He was in a

hurry to pay me. However, we do not know how difficult this invoice is to make. In order to escape the tariff, he broke a good product into 5 pieces and made 5 different invoices with 5 different names. However, when the goods were shipped, it was still a whole. My boss agreed that I should do this to him, so I need to make 5 bills of lading for this business. I don't know if your predecessors have experienced such things as me, which is really annoying. I don't understand how hard it is for a rookie to start his first business... However, I will stick to it and treat every customer sincerely. However, sometimes I am really confused. After all, I do not major in foreign trade, so I do not know how to deal with many problems. If any predecessors have had this experience, please tell me if this is the right thing to do.

I just did a great thing. I registered an account on a professional website and posted my product on it. All free, we do not be afraid of trouble, to post it, I think there will be a harvest! We want to cast a wide net, doing foreign trade should be like this!

In addition, I have just received the reply from the customer I contacted half a month ago. He told me that he would return to his country soon and contact me when he returned. I was really moved to tears. My sad mood brightened up a few days ago when no one answered my letter. Think of the lyrics of a song, the sun always in the wind and rain, clouds on the sky, cherish all touched, each hope in your hands..... Life will not be too touched, I want to know how to cherish
