

TPU德国巴斯夫（代理商）聚氨酯

产品名称	TPU德国巴斯夫（代理商）聚氨酯
公司名称	苏州安俊尔塑胶科技有限公司
价格	.00/个
规格参数	品牌:巴斯夫
公司地址	江苏省苏州市昆山市花桥镇蓬青路888号
联系电话	021-39596360 18501713476

产品详情

巴斯夫Elastollan系列介绍

- Elastollan 1085A Thermoplastic Polyether-Polyurethane-Elastomer with excellent mechanical properties
- Elastollan 1154D53 is a polyether-based thermoplastic polyurethane (TPU). It exhibits excellent abrasion resistance, toughness, transparency, low temperature properties, hydrolytic stability, and fungus resistance.
- Elastollan 1164D50 is a polyether-based thermoplastic polyurethane (TPU). It exhibits excellent abrasion resistance, toughness, transparency, low temperature properties, hydrolytic stability, and fungus resistance.
- Elastollan 1174D50 is a polyether-based thermoplastic polyurethane (TPU). It exhibits excellent abrasion resistance, toughness, transparency, low temperature properties, hydrolytic stability, and fungus resistance
- Elastollan 1175A10W is a polyether-based thermoplastic polyurethane (TPU) containing a plasticizer.
- Elastollan 1180A10 is a polyether-based thermoplastic polyurethane (TPU). It is specifically formulated for extruded profile, sheet and film applications.
- Elastollan 1185A10FHF is a polyether-based thermoplastic polyurethane (TPU) containing a non-halogenated fire retardant. It is specifically formulated for wire and cable jacketing, extruded profile,

sheet and film applications.

Elastollan 1185A10XU is a polyether-based thermoplastic polyurethane (TPU) with UV stabilizer and a MFI value of at 190 ° C/21.6 kg).

Elastollan 1185A50V is a polyether-based thermoplastic polyurethane (TPU). It exhibits excellent abrasion resistance, toughness, transparency, low temperature properties, hydrolytic stability, and fungus resistance.

Elastollan 1190A10 is a polyether-based thermoplastic polyurethane (TPU). It is specifically formulated for extruded profile, sheet and film applications.

Elastollan 1195A10 is a polyether-based thermoplastic polyurethane (TPU). It exhibits excellent abrasion resistance, toughness, transparency, low temperature properties, hydrolytic stability and fungus resistance.
