产品详情

台化PP树脂（TIRIPRO PP Resin）采用日本CHISSO气相制程法，以新一代高活性触媒，及严密之品质管理系统，年產達51萬公噸。可生產單聚物（HOMOPOLYMER），共聚物（RANDOM及IMPACT COPOLYMER），供應射出、押出、纖維、吹氣、真空成型等加工業者，廣泛運用於家電、汽車零配件、食品包裝、玩具及民生用品。本廠設有研發中心及整套實驗工場，有能力進行新規格開發及加工技術服務。本廠生產設備採嚴格環保標準，且生產技術成熟穩定，無污染環境之疑慮。廢氣經高溫燃燒，熱量予以回收。聚合製程則無廢水產生。

Taihua PP resin (TIRIPRO PP Resin) adopts Japan's CHISSO gas-phase process method, with a new generation of highly active catalysts, and a strict quality management system, with an annual output of 510,000 metric tons. Can produce monomers (HOMOPOLYMER), copolymers (RANDOM and IMPACT COPOLYMER), supply injection, extrusion, fiber, blowing, vacuum forming and other processing industries, widely used in home appliances, auto parts, food packaging, toys and consumer goods. The factory has a research and development center and a complete set of experimental workshops, capable of developing new specifications and processing technical services. Our production equipment adopts strict environmental protection standards, and the production technology is mature and stable, and there is no doubt about environmental pollution. The exhaust gas is burned at high temperature and the heat is recovered. No waste water is produced during the polymerization process.
