## 产品详情

Apply Nycote 88 to substrates that need protection from corrosion, electrical conduction and friction. It comes in an easy-to-use two-part component. Combining the two components results in a three-hour window before the formula begins to set. Our products are easily applied by painting, spraying or dipping areas that need protection from aircraft fuels, oil, lubricants, phosphate ester hydraulic fluids, salt spray and water. Nycote 88 also provides excellent high impact, abrasion resistance, flexibility and toughness at temperatures of -70 ° F to +300 ° F (-57 ° C to +149 ° C).
