

U型槽模具 U型槽模具定制厂家

产品名称	U型槽模具 U型槽模具定制厂家
公司名称	保定韬秋模具销售有限公司
价格	20.00/套
规格参数	品牌:韬秋 型号:齐全 产地:河北保定
公司地址	莲池区七一东路2861号园中苑小区东1号楼10号底商
联系电话	13503325533

产品详情

保定韬秋模具制造商经历了从小型的[塑料模具](#)到大型钢模具转变的过程，大型的U型槽模具的使用能让工程的施工时间大大缩短，但是塑料模具无法满足对这种大体型预制件的制作的，钢材的使用不仅能对满足基本预制件的制作，还能针对不同客户提出的要求进行订制生产，但是需要客户提供模具的详细图纸。

Baoding towers in the fall of the mold maker has experienced from small plastic mold to the process of large steel mould change, the use of large u-shaped slot mold can make engineering construction time is greatly shortened, but the plastic mould can meet to the large size of casting production, the use of the steel can not only to meet the production of basic fabrication, can also according to different demands of customers for the custom-made production, but customers need to mold the detailed drawings.

U型槽钢模具

的问世不仅仅代表模具生产技术的提高，更主要的是随着科技的发展一些排水工程上的需求不一样了，很对工程使用的产品都讲究实用、方便、美观、环保等特点，所以为了满足施工方的这些需求，研发了这种U型槽模具，一般该模具常见的尺寸长50cm,壁厚是可以根据实际情况进行选择的，按照U型槽的制作要求，往往采用的是C30的混凝土进行制作，但是有的工程如果需要的预制件的硬度更强还可以使用C30以上型号的混凝土，但是要明确的是随着混凝土型号的增加他的价格也会有所浮动，还需要客户慎重的进行选择，避免生产成本增加。

U-shaped channel steel die mold not only represents the advent of the improvement of production technology, more major is along with the development of science and technology on some drainage engineering demand different, very exquisite products all over the use of engineering practical, convenient, beautiful, environmental protection and other characteristics, so in order to meet these requirements, quality research and development of the u-shaped slot mold, general common size of 50 cm long, the mold wall thickness can be according to actual condition to select, in

accordance with the requirements of making the u-shaped slot, is often used in C30 concrete made, but some projects for the fabrication of stronger hardness can also use above C30 models of concrete, but be clear with the increase of concrete models his price also will be floating, need customer carefully to choose, to avoid the cost of production increases.
