

# 金属高速钢圆锯片150-650

产品名称	金属高速钢圆锯片150-650
公司名称	昆山市周市镇精刃机械经销部
价格	120.00/片
规格参数	样品或现货:现货 是否标准件:标准件 标准编号:436
公司地址	周市镇朱家湾村综合楼底层第四间
联系电话	86-051255161269 13405155380

## 产品详情

样品或现货	现货	是否标准件	标准件
标准编号	436	品牌	精刃
型号	齐全	材质	HSS
用途	切金属专用锯片	是否进口	是
是否涂层	涂层	规格	齐全
适用机床	切管机	是否库存	库存
是否批发	批发		

专业生产高性能全磨齿高速钢锯片，锯片铣刀，铣刀片，切口铣刀，三面刃铣刀，切管圆锯片，整体硬质合金锯片铣刀（钨钢），并承接非标定制锯片。在锯片设计、制造方面积累了丰富的经验。选用优质原材料组织生产，技术力量雄厚，检测设备齐全，加工设备精良。在工具生产厂家中首家实行质量承诺服务，真正做到以诚为本，信誉至上。公司以：“优异的品质，实惠的价格，优良的服务”为宗旨来满足用户的需求，竭诚欢迎新老客户前来洽谈垂询。

产品：锯片铣刀，金属锯片，铣刀片，切口铣刀，切管圆锯片等

尺寸规格：外径 20~600mm，孔径 5~40mm,厚度，0.2~8.0mm

齿型：无齿，粗齿，中齿，细齿；开刃

齿形：尖齿，圆弧齿，交错齿（左右齿，高低齿）

开齿方式：铣齿，磨齿，全磨齿

表面涂层：本色，镀钛涂层，氮化涂层，氮化铬涂层。

材质：w6mo5cr4v2(m2, 6542)、w18cr4v(w18), w9mo3cr4v(w9)等高性能高速钢，钴系类m35、m42超硬高性能高速钢。高速钢材料均锻打处理，高精度控制淬火处理，硬度更高，耐磨更好，综合性能更好

硬质合金（钨钢）。

用途：主要用于铁，铝，铜等中硬以下金属材料窄而深的槽加工或切断。也可用于塑料、木材等非金属的铣削加工。超硬材料锯片铣刀，硬质合金锯片主要用于难切削材料(耐热钢，不锈钢等高强度钢)的铣切)而且用后可以反复修磨锯齿,无灰尘，无杂音，无毛齿等优点。

公司电话；0512-55161269

地址；江苏；昆山周市镇朱家湾路8号

specializing in the production of high grinding hss blades, milling cutter blades, incision, milling, face-sides cutters cut tube circular saw blades, solid carbide cutter blades, and accepts) (tungsten non-standard customized blades. in the blade design, manufacturing has accumulated rich experience. select high-quality raw materials production organization, strong technical force, complete test equipment, processing equipments. the first home in tool factory implements quality service, accomplish truly commitment to co-oriented, the supremacy of credibility. companies with "excellent quality, affordable price, excellent service" as the aim to satisfy the demand of users, sincerely welcome old and new customers to negotiate.

products: blades, metal blades, milling cutter, incision, circular pipe cutters etc

specification: diameter, 20 - 5-600mm diameter 40mm, thickness, 0.2-8.0 mm

tooth type: toothless, thick tooth, the presentation;, usually.if

gear tooth shape: pointed, arc tooth gear tooth, crisscross, around (tooth)

open mode: milling gear, gear, gear grinding mill tooth

the surface coating of titanium coating, coating, coating, nitriding, chromium nitride coating.

material qualitative: w6mo5cr4v2 (m2, 6542), w18cr4v (w18), w9mo3cr4v w9 (etc) is high, the cobalt m35 of high performance, high m42 super-hard. hss materials, precision forging quenching process control, hardness higher, wear-resisting, comprehensive performance is better

hard alloy (tungsten).

use: mainly used for road, aluminum, copper, iron under hard metallic materials in narrow and deep processing or cut off the slot. also can be used in plastic, wood etc. nonmetal of milling. superhard materials, carbide cutter blades is mainly used for cutting blades materials (heat-resisting steel, stainless steel, high strength and milling) of grinding can be repeated after, no dust, no noise, glabrous gear, etc.
