产地	顺德		

新亮户外防雨防雪防水喷雾剂

采用全新纳米技术生产的多用途防水剂，渗透力极强，作用于户外纺织品面料，使纺织品面料与水不亲和。能有效防水、防油、防尘、防污及防脱色。如在户外新纺织品使用前喷涂，能延长纺织品使用寿命和保持美观，效果更佳。

使用范围：用于户外新纺织品的基础护理，适用于户外各类纺织品面料，如户外服装、背包、鞋帽、露营装备等各种面料。

使用方法：使用前先摇匀，距离所喷物件20厘米左右，直接喷涂在所喷物件至均匀待自然晾干即可。（由于各种纺织品的生产工艺不同，请使用前请在纺织品内面不明显处进行小面积涂试，如不出现变色等问题再整体喷涂。）

注意事项：压缩易燃、远离火源、切勿在室温超过50 的地方存放或使用（在室外或良好通风处使用），请置于儿童触摸不到的地方。用完后请勿将铁戳破或扔进火中。

many uses that adopt all new na rice technique production waterproof, permeate dint the strongest, the function anticipates at the outdoor textile product noodles and makes textile product noodles anticipates isn't closes with water and.ability effective watertightness, defend oil, dust palliative and defend dirty and defend to take off a color.such as spray before the outdoor new textile product uses, can prolong textile product service life and keep beautiful, the effect is better.

use scope:the foundation nursing used for an outdoor new textile product is applicable to each kind of outdoor textile product noodles to anticipate and anticipates such as outdoor clothing, shoulder bag, shoe hat, and camping material...etc. various side.
