

巨强牌双把轻钢龙骨钳 打孔、顶切、大力

产品名称	巨强牌双把轻钢龙骨钳 打孔、顶切、大力
公司名称	付玉如(个体经营)
价格	19.00/个
规格参数	作用:打孔、顶切、大力 形状:平嘴 特性:防磁
公司地址	中国 山东 临沂市 临沂市河东区五金城西911号
联系电话	86 0539 7116891/8300074 13608990776

产品详情

作用	打孔、顶切、大力	形状	平嘴
特性	防磁	品牌	巨强牌
材质	高碳钢	样式	德式
柄部材质	铬钒钢	规格	300mm (mm)
重量	0.9 (g)		

头部【钢性韧性按照欧洲标准】冲头【采用优质高碳钢制造抛光处理】手柄【多款选择】品名；龙骨钳

规格；12寸

材质；精铸

冲头；高碳钢

外观；喷塑

包装；插卡

数量；每件36把

柄部；带套

售后；全质量三包

临沂巨强五金工具厂

本品采用 优质钢材 制造冲头采用铬钒钢 制造 高频炉 热处理 系统，适用冲切壁后为0.6mm-0.8mm的龙骨

达到龙骨与龙骨之间的连接和固定，该连接工艺简便易用，不需钻孔、铆接，更不需要铆钉、螺丝等材料，达到快捷、牢固、省时省力、降耗、提高工效等效果。

钳体与被固定面保持垂直，冲切口的位置设在竖龙骨与横龙骨底面成45斜度为宜，然后用力压龙骨钳受柄，使冲头穿透两层龙骨，达到横龙骨与竖龙骨完全牢固吻合为止。郑重承诺如发现任何质量问题保退保换

after, all three

linyi giant strong metal tool factorythis product adopts the high quality steel products manufacturing quality of chosen t7926 appearance we adopted a variety of colour and handle handle after the match we design professionals with antiskid role by high carbon steel manufacture punch all adopt high frequency furnace system to achieve durable heat to 0.8 - the keel connection between 1.2 fixed, the good efficient use convenient

this product adopts the high quality steel products manufacturing punch using frequency furnace of steel manufacturing chrome vanadium, heat treatment system for punching walls 0.6-0.8 mm after the keel to the keel mm with keel of connections between the connection and fixed, easy to use, does not need to drill empty, riveting, more do not need rivet, etc, quick, strong and saves time and effort, consumption and raise efficiency, etc.

clamp and vertical surfaces by fixed position of incision, rushed in vertical and horizontal keel underside keel 45 rake advisable, and press it hard keel, punch by handle plier, through the two layers keel with vertical keel completely solid keel anastomosis..... promise that if the policy change any quality problem
