

# Deltec 球滚动、反弹一体检测仪

产品名称	Deltec 球滚动、反弹一体检测仪
公司名称	斯迈格(北京)国际贸易有限公司
价格	.00/个
规格参数	品牌:Deltec 用途:球滚动和反弹检测 适用行业:运动场地检测
公司地址	中国 北京 北京市 朝阳区朝外大街甲6号B-4A-47
联系电话	86-010-59073251

## 产品详情

品牌	Deltec	用途	球滚动和反弹检测
适用行业	运动场地检测		

同时检测球反弹和滚动.可折叠,易携带,检测效果精确

one important factor in assessing artificial turf surfaces is the interaction between the ball and the field. the various sports federations such as fifa have set up a number of requirements for artificial turf. the ball roll and ball rebound characteristics are one of them. especially for clubs, municipalities, installers and maintenance companies, deltec developed the club ramp with ball rebound to test the ball roll and ball rebound.

requirements:

the ball has to be positioned at 1 meter height 45 degree slope with 2 rails smooth transition from ramp to surface by means of a 500mm radius

the distance of the continued rolling of the ball is measured. this measurement is taken in several directions and different locations on the field. for the ball rebound the ball has to start from 2 meters height, then the rebound height is measured.

your benefits:

2 tests in one device complies with the requirements smooth ball roll clear measuring scale in lightweight aluminium collapsible compact mechanism fast and easy testing of surfaces

applications: football standards: en 12234, en 15330, fifa 03
