品牌 Deltec 用途 运动场地检测

专业的实验室级别人造用动员价格昂贵, deltec的用户性人造运动员同样可以检测冲击吸收,垂直变形和能量补偿.可以用于人造草坪场地的工程验收,用户自检和场地日常维护检测.

可以应用于人造草坪和其它运动场地

an artificial turf pitch involves a large investment. you want to profit from this investment as long as possible, financially and quality wise. this requires the right maintenance but how to monitor the pitch quality and maintenance?

professional equipment is now no longer the exclusive domain of laboratories and turf producers. deltec developed the club tester especially for installers, maintenance companies, municipalities and clubs.

the club tester is a lightweight, easy to use and budget friendly test device. it monitors the shock absorption, vertical deformation and energy restitution of artificial turf football pitches. by reacting with the right maintenance periodically, a longer pitch lifetime with better playing characteristics can be reached.

your benefits:

compare test results directly with fifa requirements
very easy to use (one button operation)
self calibrating
lightweight (10kg in total)
compact (80cm long tube)
budget friendly

applications: football in particular, other sports surfaces in general
