

Gabriel Fluorolube S-30 CTFE Fluoropolymer Oil

产品名称	Gabriel Fluorolube S-30 CTFE Fluoropolymer Oil
公司名称	上海恩莱保贸易有限公司
价格	.00/个
规格参数	HUNTSM:S-30
公司地址	上海市松江区金高路2388号813室
联系电话	86-021-20228098 13391171050

产品详情

Fluorolube oil is a liquid lubricant that delivers long-lasting lubrication for metallic surfaces (except copper, aluminum and magnesium) in applications requiring stability and performance in strongly acidic and/or oxidizing environments. It is a saturated, hydrogen-free, low-molecular weight polymers of chlorotrifluoroethylene (CTFE) that combines high-temperature performance, non-flammability and chemical inertness under many demanding conditions. Available in a range of viscosities, Fluorolube oils are compatible with chlorine, oxygen, hydrogen peroxide, red fuming nitric acid and other strong oxidizing agents, and are nonflammable.
