the yuteng plants development co. , ltd . is located in near the beautiful buddhism holy land-wutai mountain.the enterprise professionally processes various natural plants . its main products are silymarin with a yearly production of 50 tons and silybin with a yearly production of 8 tons . it owns a galaxy of talent , advanced equipment and perfect test facilities . it passed the examination of the national import-export commodity inspection bureau and all the products meet the national standards .

the company pursues the spirits of modesty , practicality ,

initiative and innovation . we warmly welcome all friends from home and abroad .

2、水飞蓟素

水飞蓟素是黄酮木脂素类化合物，是从菊科药用植物水飞蓟种子的种皮中提取出来的，呈黄色粉末，味苦。主要成分有水飞蓟宾、异水飞蓟宾、水飞蓟宁和水飞蓟亭等黄酮类物质。主要功效：保护肝脏，提高肝脏功能，促进胆汁分泌和消炎。作为强抗氧化剂，能够清除人体内的自由基，延缓衰老。该产品能够防止酒精、化学毒素、重金属、药物、食物毒素、环境污染等对肝脏造成的损伤，促进肝细胞的再生和修复。因此被称为“天然的保肝药”。另外水飞蓟素具有抗辐射、防止动脉硬化、延缓皮肤老化等功效。它广泛应用于医药、保健品、食品和化妆品等产品中。

保质期：3年

silymarin

silymarin is a kind of flavonolignan compound, extracted from the seed capsule of plant silybum marianum, it is yellow powder with a bitter taste. the main ingredients are: silybin, isosilybin, silydiynin, silychristin, etc. it has the efficacy for liver protecting, improving the function of liver, promoting biliation and diminishing liver inflammation. as a kind of better antioxidant, it can clear free radical in human body, postpone senility. silymarin can protect the liver from damage of alcohol, chemical toxicant, drug, food poison, accelerate liver cell regenerating and repairing. so it is called "the natural liver-protection drug". in addition, silymarin has the function of anti radiation and, arteriosclerosis preventing, skin-aging delaying. it is widely used in drug, health products, food and cosmetics.

shelf life: 3 years
