

# DDZ,DSZ直流电源 数控直流电源

产品名称	DDZ,DSZ直流电源 数控直流电源
公司名称	北京奥恒达电气设备有限公司
价格	.00/台
规格参数	类型:数控直流电源 品牌:奥恒达 型号:DDZ
公司地址	北京市通州区台湖镇永隆屯村委会东300米
联系电话	13911292558 13910260828

## 产品详情

类型	数控直流电源	品牌	奥恒达
型号	DDZ	工作温度	40 ( )
产品认证	ISO9000和CE		

ddz、dsz直流电源是我公司最新研制开发的整流滤波直流电源变压器，具有结构紧凑、外观美、纹波小、容量大、防护等级较高等特点。适用于交流50hz或60hz、额定电压不超过500v、额定输出电压为dz：24v的电路中，用作各行业多种设备一般电气控制的直流电源。

use

ddz, the dsz dc power supply is our company newest development rectification filter dc power supply transformer, has the structure compact, outside the beautiful appearance, the ripple small, the capacity big, the protection rank higher characteristic. is suitable in 50hz or 60hz, the rated voltage 500v, the rated output voltage dc24v electric circuit, applied to many kinds of equipment common electricity control dc power supply.

## 二、特点

- 1、产品符合iec标准;5、变压器与整流电源一体化、结构紧凑、外观美观；
- 2、额定输入电压带有±5%抽头；6、铁芯采用气体保护氩弧焊工艺、无气隙、无噪音、损耗小；
- 3、大电容滤波，波纹系数<5;7、内装压敏电阻，进行过电压保护；
- 4、快速熔断保护；8、防护等级达到ip20，能有效达到触摸保护要求。

characteristic

1st, the product conforms to the iec standard;

2nd, the rated input voltage has the terminal  $\pm 5\%$  ;

3rd, big capacitor, ripple ratio  $<5$ ;

4th, fast fuse protection;

the transformer and the rectification power source integration, the structure compact, the outward appearance is artistic;

the iron core uses the gas protection argon welding craft, does not have the air gap, does not have the noise, loses slightly;

the internal installation varistor, carries on the overvoltage protection;

the protection rank ip20, can meet the touching protection requirements effectively.
