miraculous insecticide chalk

product information:

the miraculous insecticide chalk is a highly effective product used in destroying crawling insects and yet not toxic to humans. it is highly recommended in killing troublesome insects like cockroaches, ants, bed – bugs and lice.

this miraculous chalk is a contact insecticide which attacks the nervous system of the insect immediately upon contact. consequently, the insect ' s nervous system will completely fail to function. it will die within one to two hours after touching the surface powder with its body. the chalk is most effective to use at night.

usage directions per target insect are as follows:

(1) cockroaches: (a) if they are hiding in cracks, draw lines along the edges of the cracks. (b) if they are hiding in cabinets or boxes, just open them up, draw parallel lines on both horizontal and vertical surface. (c) if the insects have infested areas that are wet or difficult to draw lines. we recommend you draw 2 or 3 big circles on a movable cardboard paper or plywood and then put a powerful bait for cockroaches in the middle.

(2) ants: simply draw line in the path of ants. where you wish to prevent their invasion on food products like sugar, bread, cereals etc; place food product on a suitable pedestal and draw circle at the base of the pedestal. be sure to cover food securely at all time. wash hands after handling of the chalk.

(3) bed_ bugs: if bed- bugs have infested your bed, remove the mattress, draw heavy parallel lines along edges crack or groove. also, draw lines in crevice of the mattress before putting it back on the bed. on the other hand, if bed – bugs have infested your boxes or cabinets, directions indicated above for cockroaches must be followed.

(4) lice: if poultry lice are your problem draw lines along grooves and cracks in the chicken or other sleeping areas. to rid lice in human hair, break chalk into 5 equal parts. take one part and grind into powder. pour powder into 5 teaspoonfuls of petroleum jelly or shea – nut butter. stir and mix thoroughly. apply as many finger scoops as needed into hair only. thoroughly wash out of hair with soap or shampoo after one hour.

storage conditions: keep it in dry and ventilated surroundings under 40 . avoid direct sunlight, vibrating and moistening situations.

warning: as with all insecticides, keep away from misuse by children.

please note: in drawing all lines. try and draw heavy lines leaving enough powder on the surface so as to acquire better

results.
