1?Chemical Name: Manganese Sulfate

2?Molecular Formula : $\text{MnSO}_4 \cdot \text{H}_2\text{O}$

3?Molecular Weight:169.02

4?CAS:7785-87-7

5?Character:It is pale pink monoclinic system coarse crystal, odorless. Relative density is 2.95. It starts to lose crystal water when heated to above 200. It almost loses all crystal water when above 280. And to 700, it changes to anhydrous melts. It starts to decompose when heated to 800 and black insoluble Mn_3O_4 is left. It completely decomposes at the temperature of 1150. It is freely soluble in water, but is insoluble in alcohol.

6?Usage:Nutritional Supplement (Manganese Fortifier)

7?Packing: It is packed with polyethylene bag as inner layer, and a compound plastic woven bag as outer layer. The net weight of each bag is 25kg.

8?Storage and Transport:It should be stored in a dry and ventilative warehouse, kept away from heat and moisture during transportation, unloaded with care so as to avoid damage. Furthermore, it must be stored separately from poisonous substances.
