## 产品详情

现货 VESTAMID L L2141 聚酰胺12 用途 液压应用

# VESTAMID L L2141

聚酰胺12 [Evonik Industries AG](#) 产品说明：

Unfilled polyamid 12 compounds Characterization: high viscosity, light and higher heat stabilized than L2140, with processing aid Application Examples: Hydraulic clutch lines, vacuum lines The properties of PA 12 compounds can be modified to suit the requirements of many applications by incorporating various additives such as stabilizers, plasticizers, reinforcements, and fillers. The VESTAMID L compounds of Evonik comprise a range of various products that are customized to the requirements of processors and users. Many of the PA 12 compounds are suitable especially for the injection molding of precision parts; others have been developed specifically for the extrusion process.
