产品详情

-80 super-low temperature duplicated refrigeration unit 60

Specific application fields of cryogenic units:

- 1, pharmaceutical: synthesis, hydrolysis, esterification, etherification and other need temperature control process.
- 2, chemical industry: distillation and purification, rubber grinding, low temperature grinding.
- 3, metal treatment: low temperature assembly, low temperature with fire.
- 4, food: tuna and other ultra-low temperature food processing and storage.
- 5, electronics: parts environmental test.
6. Aerospace: heat sink test, parts environment simulation test.

7, environmental protection: waste gas condensation recovery, net emissions.
