mounting tape is strong double-sided tape to mount items up to 5 lbs on average. it can be used on almost any type of material.it is ideal for many surfaces and convenient for your camping and rv needs. no glue or tools are needed, so use easily.

how to usemounting tape comes in a multitude of roll sizes and colors. to use mounting tape, the amount needed is cut off and stuck to the object being mounted. then, the back cover is peeled off to exposes the other side"s adhesive, and the object can be placed where it is needed. most mounting tape is very hard to peel off, so care should be exercised during placement. newer, more advanced types can peel off easily, but these are very expensive.
