

Medical Inks-医用X射线墨水

产品名称	Medical Inks-医用X射线墨水
公司名称	广州市银标贸易有限公司
价格	99.00/kg
规格参数	1:1
公司地址	广州市番禺区钟村街钟一村“高沙”工业区(厂房A)AS398
联系电话	13710259859 13710259859

产品详情

Radiopaque medical inks - developed exclusively by CI Medical for medical applications - is a breakthrough technology in marking medical devices for tracking exact location during internal procedures. While Radiopaque markers provide high contrast and bright edges when viewed on film or with a fluoroscope, they do not loosen, fleck or peel; nor do they compromise the integrity of the medical device in any way.

By absorbing x-rays, Radiopaque Medical Inks are easily visible using fluoroscopy. This un-retouched ASTM standard test for radiopacity illustrates the effectiveness of

Radiopaque medical inks (top right) when compared to traditional platinum bands (bottom left). The materials used in this fluoroscope test have varying densities of tissue mass and bone.

Indicator Radiopaque 1.5 mm Line Marker, for CT.

The Indicator Radiopaque Marker is used in CT, RT Simulation, Treatment Planning, Diagnostic Radiology, Angiography, Mammography and Fluoroscopy. These markers are used to identify masses, scar tissue, moles, birth marks or any point of interest. The Indicator Radiopaque marker provides a clear and accurate reference point with no spray artifacts.

Flat marker, will not indent tissue.

Disposable.

Clear adhesive backing.

Multiple sizes available.

Lead Free.

NOT for use in MR
