产品详情

Features: 1. Time-saving shopping: For children who are in pain when going to a shoe store or in the growing period, they can use a foot measuring device at home to measure the size of their feet, and then order shoes online, which is much simpler than walking to the shoe store. A must-have artifact for buying shoes online.2. How to use: Put the heel against the bezel, move the white plastic slider to the toe, and read the number through the pointed protruding part in the middle of the white box. This is the exact size of the measurement. Do not wear shoes or socks to measure, as this will cause errors in size.3. The full scale is suitable for babies, children, adults, men and women over 6 months old. This is a very useful gadget for families with children.Package included: 1 set foot measure sizer device
