REGULATION concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) 2007/60/EC
REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union regulation that aims to protect human health and the environment from the risks posed by chemicals. It requires manufacturers and importers of chemicals to provide information on the properties and uses of the substances they produce or import. REACH also sets limits on the use of certain hazardous chemicals and requires companies to take steps to reduce the risks of exposure to these substances. REACH applies to all chemicals placed on the market in the EU, regardless of their origin or the quantity. REACH also applies to chemicals used in products. REACH requires companies to register their chemicals with the European Chemicals Agency (ECHA) and to provide information on the properties and uses of the substances they produce or import.
