

南宁洁伶卫生用品提供负离子卫生巾各种功能型活氧负离子卫生巾加工

产品名称	南宁洁伶卫生用品提供负离子卫生巾各种功能型活氧负离子卫生巾加工
公司名称	广西南宁洁伶卫生用品有限公司
价格	.00/片
规格参数	
公司地址	南宁市经济开发区友谊路21-7号
联系电话	0771-6709485

产品详情

活氧&负离子系列卫生巾简介 洁伶活氧&负离子卫生巾引进国际领先的双芯技术，活性氧和负离子有机地结合在一起，通过高科技手段镶嵌于卫生巾中的“活氧离子芯片”是用无纺布和天然电气石矿石粉（俗称负离子粉）等其他原材料通过科学的方法配置而成，该芯片里的电气石粉在遇到潮湿或在开放的状态下就会通过物理变化而自然的释放出大量活氧负离子分子以及发射出频率较高的远红外射线。

“Jieling” Active oxygen & Anion sanitary napkins using the dual-core leading technology,with this technology active oxygen and anion can organic combination.About the “oxygen ion chip” is a non-woven fabrics with natural ineral-tourmaline which we put on the surface of sanitary napkins.When the tourmaline in the chip become wet and open,it can release a large number of natural elements and active oxygen anion,at the sametimes emitted high frequency far-infraed rays. 该产品中的“活氧负离子芯片”产生的负氧离子具有较高的活性，且有很强的氧化还原作用，能破坏细菌的细胞膜或细胞原生质活性酶的活性，从而达到抗菌杀菌的目的。负离子还可使人体组织的氧化过程力度加强，使人体组织获得更多的氧，在这样的环境下引起妇科疾病的致病源-厌氧菌无法存活，确保女性健康。该产品同时含有薄荷成分，使用过程中给人清凉干燥的感觉，缓解经期带来的不适。活氧负离子芯片每立方厘米能释放出多达6100个负离子，当空气中的负离子低于1000个/立方厘米，女人就会感到疲倦，头晕，头痛，抑郁和湿冷。当空气中的负离子达到1000-2000/立方厘米，它能确保人类的健康，当负离子浓度达到5000 /立方厘米，它可以提高免疫力和抵抗细菌的能力，缓解紧张局势，减少刺激，消除异味和疲劳，改善内分泌，增强新陈代谢，使每一个妇女可以享受健康、舒适的感觉。活氧和负离子卫生巾给你双重呵护，双倍健康。随包赠送女性健康自我检测卡。 The chip of “active oxygen & anion” release anion has high-activity and strong redox,it can damage the bacterial cell membrane or cell protoplasm activity of the enzyme for bactericidal antibiotic.Anion can make more oxygen to our body, Killing gynecological disease pathogens to ensure the health of women.The chip contains MINT,gives women cool,dry feeling and ease menstrual discomfort.Active oxgen & anion chip can release anion up to 6100/cubic centimeters.When the air less than 1000 anions/ cubic centimeters,we feel atigue,dizziness,headache,depression ,cold and wet.When the anios in the air reach 1000-2000/ cubic centimeters can ensure our health,when the anions come to 5000/ cubic centimeters, it can increase the capacity of immunity and resistance of bacteria to ease tensions, reduce the incentives to eliminate odor, and fatigue, improve endocrine, enhance metabolism.Every one can enjoy a healthy,comfortable feeling. “Active oxygen & anion” sanitary napkins give double care and double health to you,each pack included 1 colpitis self-checking card. 活氧&负离子系列卫生巾品质特点

国际领先---活氧负离子双芯技术，双效抑菌、双重护理。

超高性能---超强吸水、超强锁水、绝无渗漏、超强透气。

优质材料---100%纯棉面料、进口锁水因子、进口透气底膜、专业导流层。

独特设计---国内独家首创8层设计、更高性能、更人性、更舒适、更健康 您可以将本品和您身边的任何一款产品进行比较，也可以送至国家权威部门进行专业检测，您会发现：此款活氧负离子卫生巾更加卓越。

Active oxygen & Anion sanitary napkins: International leading technology---Active oxygen & Anion double-chip, double health. High performance---Super absorbent, lock water and breathable, no leakage. High-quality materials---100% cotton fabric, imported SPA, breathable film, professional diversion level. Unique design--- Domestic exclusive first eight-layer design, higher performance, more human, more comfortable, more healthy. You can compare our product with any other brand products, you can also send the products to the authority of the state department for professional testing, you will find that the Active oxygen & Anion sanitary napkin is more remarkable.

活氧&负离子卫生巾: 世界首创8层设计，细心呵护女性健康

第一层：速渗丝薄柔棉表层——吸收加快3倍

第二层：国际领先的活氧 & 负离子绿芯片——有效防菌、抑菌

第三层：无尘纸包装

第四层：独有专业导流层，能加速液体迅速扩散，有助瞬吸，防止侧漏

第五层：强力锁水（高分子聚合物、干法纸，具有强力锁水功能）

第六层：无尘纸包装

第七层：透气舒爽（底膜具有强透气性，会呼吸）

第八层：离型纸（斑纹间断式背胶设计，符合人体工学原理） Active oxygen & Anion chip sanitary napkin, with 8 layers, take care about women healthy. 1) Soft Cotton Surface - to make the absorption faster dry and to prevent wetness. 2) Anionic Padding - with 6100 negative ions chip per cm² 3) Top Cover - sterilized & dirt-free polygel material. 4) Polygel Material - super absorbent material with strong liquid-retention to prevent wetness. 5) ADL-professional diversion tier-rapid diversion fluids, make the absorption more faster. 6) Lower Cover - sterilized & dirt-free polygel material. 7) Breathable Material - to release air & pressure without leaking / allows free-flowing of air. 8) Adhesive Material - for better mounting/easy to peel off.
