产品详情

The hexamine we are producing is not added with antiblocking agent. But it is not easy to block for a long time. We have had an experiment in the stock. Temperature is 20 degree, and moisture is 30%. 8 bags in a roll. The hexamine is not caked at all after 7 months. Although after the factory adding the antiblocking agent, the hexamine can be stocked for about 18 months without caking. The content will be lower. **HEXAMETHYLENETETRAMINE (HEXAMINE)** is a white crystalline powder with slight amine odor. Applications: Vulcanizing agent and rubber blowing agent, used as a dye fixative and in the preservation of hides. Smokeless pellets. Stabilizer for oils and synthetic resin, Surface treatment, Vulcanizing rubber. Additives in deodorizing powder. Anti-corrosive agent in steel. Absorption of poisonous gases. Anti-caking agent for prilled urea. Disinfectant. Antibacterial agent. Explosives (RDX), (HMX), (HMTA).
