产品详情

POLY(STYRENE), -THIOL-TERMINATED

Exposure of thiol-terminated polymers to air and light results in non-controlled dimerization (formation of polymer with disulfide group in center). We check each lot before shipping to confirm end-group termination (which may result in a few days delay). The shelf-life of thiol-terminated polymers is guaranteed for 3-5 weeks after shipping. The polymer must be stored under inert atmosphere and at low temperature.
