KRATON G1651 E

Styrene Ethylene Butylene Styrene Block Copolymer

Kraton Polymers LLC

产品说明：

Kraton G1651 E is a clear, linear triblock copolymer based on styrene and ethylene/butylene, S-E/B-S, with bound styrene of 31.5% mass. It is supplied from Europe in two physical forms identified below.

Kraton G1651 EU - supplied as undusted'fluffy crumb

Kraton G1651 ES - supplied as fluffy crumb dusted with amorphous silica

Kraton G1651 E is used as a base material for compound formulations and as a modifier of thermoplastics. The inherent stability of the mid block suggests the use of this product in applications that must withstand weathering and high processing temperatures.
