

# photoluminescent paint

产品名称	photoluminescent paint
公司名称	济南坤友发光科技有限公司
价格	.00/个
规格参数	类型:夜光涂料 颜色:蓝色 品牌:lunbo
公司地址	山东省济南市历下区解放路43号银座数码广场1-906-39A
联系电话	13361012156 15698008033

## 产品详情

类型	夜光涂料	颜色	蓝色
品牌	lunbo	起订量	50kgs
总固含量	60 ( % )	保质期	12 ( 个月 )

### introduction

after special surface treatment,the photoluminescent color pigment can be incorporated into paints as a kind of color additive to produce diverse types of photoluminescent paint,with the advantage of prompt and convenient application.for example: water-based paint ,sand-textured paint, road marking paints,floor paint and metal paint.

### photoluminescent water-based acrylic paint

photoluminescent water-based acrylic paint is a novel environmentally friendly paint developed by our company. adopting water as the medium, with the advantages of non-toxicity, hard-flammability, good adhesion, good weather-resistance, outstanding luminous effect, it can be used on the surface of such materials as cement, wood, metal and plastic etc.

### property index

item		index
state in the vessel		easy to stir,has no rigid
viscosity mpa · s		6000
color and appearance of the membrane		uniform
drying	surface dry , h	1
	whole dry , h	

	24
adhesion	1
water-resistance , 96h	no abnormality
alkaline-resistance,48h	no abnormality
temperature-resistance of the coating ( cycle 5 times )	no abnormality
wash-resistance of the coating( 1000 times )	no abnormality

suggestions1.this water-based pl paint is suitable for using as indoor or outdoor signs paint, not suitable for roads.2. the paint should be evenly stirred before using, you can dilute it with clean water if it is too sticky. please do not add any other materials into the paint to avoid transforming the paint"s chemical property.3. brushing/ spraying one layer of white paint as the primer before brush the photoluminescent paint can ensure good adhesion between the two layers and strengthen the luminous effect. 4.the thickness of the luminous layer should be more than 150um to get better effect.
