联系电话	86 0750 3226070/3266088 13924682763

## 产品详情

材质	PE	包装层次	销售包装/终端包装
工艺	凸印	用途	医药袋
型号	HR	规格	457*711*965mm

医院用防交叉感染半水溶洗衣袋。

医院用防交叉感染半水溶袋。常用的尺寸有457\*711\*762mm\*18micron和457\*711\*965mm\*18micron.

hdpe袋+pva贴条和pva水溶线绑带。收集好污染衣物后可直接投入洗衣机里进行洗涤，洗完后收集那个pe袋。

可以根据客人要求进行oem加工生产。

the red soluble strip laundry bag developed as a revolutionary precaution tool to enable linen handlers to economically isolate, transport and disinfect foul and contaminated linen.our premium quality red soluble strip laundry bags are designed to be used as liners. once filled, the contaminated linen can then be handled and transported to the laundry without fear of bacterial dispersion and exposure. the filled soluble strip laundry bags are loaded directly into the washing machines eliminating the need to open bags in order to sort and/or load the contaminated linen as. during the agitation cycle, the water soluble strip and tie closure dissolve, releasing the contents of the bag into the washing solution. at the conclusion of the wash cycle, the used and disinfected portion of the laundry bag is removed and discarded or recycled.
