

# MC74LCX07DTR2G驱动IC 贴片TSSOP-14缓冲芯片

产品名称	MC74LCX07DTR2G驱动IC 贴片TSSOP-14缓冲芯片
公司名称	深圳市宏鼎微科技有限公司
价格	.00/件
规格参数	品牌:ON(安森美) 型号:MC74LCX07DTR 封装:TSSOP-14
公司地址	深圳市龙华区民治街道新牛社区民治大道牛栏前大厦A1408 (注册地址)
联系电话	23002456 18688770636

## 产品详情

### MC74LCX07DTR2G驱动IC 贴片TSSOP-14缓冲芯片

六缓冲器/驱动器(漏极开路输出)

Leading the input to the transmission line this MC74LCX07DTR2G buffer and line driver by ON Semiconductor will amplify digital and analog signals. With an open drain output, this is power management at its best. This line driver has an operating temperature range of  $-40^{\circ}\text{C}$  to  $85^{\circ}\text{C}$ . In order to ensure safe delivery and enable quick mounting of this component after delivery, it will be encased in tape and reel packaging during shipment. This non-inverting device has a typical operating supply voltage of 2.5|3.3 V. Its minimum operating supply voltage of 2 V, while its maximum is 5.5 V. It has 6 channels per chip.
