

RH-65数控环形绕线机

产品名称	RH-65数控环形绕线机
公司名称	北京万德特机电技术研究所
价格	.00/个
规格参数	品牌:万德特 型号:RH-65 电源电压:2.5KW
公司地址	北京市东城区东内北中街20号楼
联系电话	13901061724 13901061724

产品详情

品牌	万德特	型号	RH-65
电源电压	2.5KW	适用线径	480mm (mm)

rh系列环形绕线机是我所在引进国外先进技术的基础上、根据国内多年使用情况自行研制开发的高精度环形绕线设备。产品自投放市场以来经长期多方验证，具有绕线精度高、适用范围宽、操作简单、调整方便，且性能稳定、高效、可靠等优点。

由于采用先进的数字控制技术，使该机具备自动计数、自动显示、自动停车、停车记存等功能，操作极为方便、直观。拉力控制采用国际上先进的电磁阻尼技术，电磁线在绕制过程中承受的拉力均匀，避免了电磁线的损伤。该机的多线并绕机构可双线或三线并绕，彻底解决了多线环形绕组加工的工艺性难题。

该机特别适用于调压器、稳压器、环形变压器、互感器等产品的加工，尤其适用于小批量、多品种绕组的绕制，是国内先进的环形绕线设备之一。

machines are high accuracy toroid winding equipments that are independently developed and manufactured by us on the basis of the introduced foreign advanced technology and long-term domestic operation experience. since being put into the market, these products have been proved by many users to have the advantages of high accuracy of winding, wide range of application, easy operation, convenient adjustment, high stabilization in performance, high efficiency and reliability etc.

with the advanced digital control technology, this machine has the functions of automatic counting, automatic display, automatic stop and keeping memory when stop. the operation is very convenient and simple. its tension control technology is the internationally advanced electromagnetic damping technology. the varnished wire receives even tension when winding and is kept from damage. through multiwire parallel winding mechanism, this machine can wind double or triple wires together. it thoroughly solved the difficult process problems of making multiwire

toroid coils.

this machine is suitable for making the products such as voltage regulator, voltage stabilizer, toroid transformer, mutual inductor etc. it is especially suitable for winding different kinds of toroid coils in small quantity. it is one of the most advanced toroid winding equipment in china.

主要技术参数

电磁线的名义直径	nominal diameter of varnished wire	1.2~4
绕线后绕组最小内径	minimum internal diameter of the coil after winding	100mm
绕线后绕组最大外径	maximum external diameter of the coil after winding	350mm
绕线后绕组最大高度	maximum height of the coil after winding	130mm
线环最大直径	maximum diameter of winding wheel	480mm
线环最高转速 (转/每分)	maximum rotation speed of winding wheel (rpm)	0~100
机床总功率	total power of machine	2.5kw
机床最大尺寸(长 × 宽 × 高)	maximum external dimension of machine (length x width x height)	1500 × 1000 × 1500
最大重量 (kg)	maximum weight (kg)	650kg
