产品详情

NR-10 - Additional Course - Safety Course for Electrical Power System (SEP)

- RG and CPF; - Passport (expatriate); - Certification in NR10 Basic Course – Safety in Installations and Services in Electricity.

目的OBJECTIVE:

制定实施控制措施和预防系统的基本准则，以确保在电气装置和服务中直接或间接与电力相互作用的工人的健康和安全。

Establish basic guidelines for the implementation of control measures and preventive systems, to ensure the health and safety of workers who interact directly or indirectly in electrical installations and services with electricity.

目标人群TARGET AUDIENCE:

Professionals who work directly or indirectly with high voltage.

培训内容PROGRAM CONTENT:

用电安全简介

Introduction to safety with electricity

电力设施和服务的风险

Risks in installations and services with electricity

风险分析技术Risk Analysis Techniques

控制电气风险的措施

Measures to control electrical risk

巴西技术规范

Brazilian Technical NormsMTE

法规MTE Regulations

个人和集体保护设备

Individual and Collective Protection Equipment

工作程序/程序

Work Routines / Procedures

电气安装文件

Documentation of electrical installations.

Electric Power Systems Organization;

Work organization; Behaviors aspects;

Impeditive conditions for service;

Typical risks in EPS and its prevention;

Techniques of analysis of risks in EPS;

Work procedures; Techniques of live-lines work;

Equipment and work tools (choice, use, conservation, verification and tests);

System of collective protection; Equipment of individual protection;

Postures and work s clothing;

Safety with vehicles and people transportation, materials and equipment;

Sign and isolation of work areas;

Installation release for service, for operation and use;

Training in transportation techniques, attendance and rough transportation;

Typical accidents;

Firefight in EPS;

Responsibilities. Technical Reference: NRs - 06, 10, 17, 23, 26, 30 anexo II, ABNT NBR 5410, ABNT NBR 14039.
