Integration of logistics and trade

On the basis of the online trading links and online transactions of trade e-commerce, we provide the buyers and sellers with standardized foreign trade agent one-stop foreign trade services, as well as the best cost-effective logistics solutions, including foreign trade documents, settlement, trade agency, financing, customs declaration and commodity inspection, as well as international logistics services. Warehouse to door, door to door, including shipping, consolidation, consolidation, FCL, yard dock, air freight line, express line, customs declaration and commodity inspection, railway transportation, multimodal transportation, land transportation line, carload transportation, vehicle transportation, domestic and foreign warehousing and distribution and other one-stop logistics and trade services. To control the one-stop online trade services of controllable information flow, capital flow and logistics from trade to logistics, reduce the cost of trade and logistics agency services, and realize the one-stop e-commerce platform of trade and logistics integration to maximize trade benefits.

Logistics and trade integration service is for different types of orders (sample order, trial order, regular order, large order) to provide one-stop logistics, trade and other comprehensive solutions, through intensive operations, to minimize the cost, to facilitate the successful transaction of orders. Small order goods and trade services mainly include special shipping lines (including integrated import and export trade agency services), as well as international express services that can be sent to the world.

Our company also provides agent material procurement such as asphalt, steel, template, cement, sand, chemical raw materials, hardware tools, auto parts, daily necessities, etc.
