# 流平剂 H-633

产品名称	流平剂 H-633
公司名称	江西海多化工有限公司
价格	150.00/公斤
规格参数	
公司地址	江西省九江市永修县杨家岭星火工业园天虹路6 号
联系电话	0792-3170318 13870276182

# 产品详情

cas: 67762-85-0

化学成份: 聚醚改性有机聚硅氧烷

### 性能特点

优良的有机硅表面助剂。通过降低涂料表面张力以提高底材的润湿性。增加表面滑爽及耐划伤性和防粘 连性,改善流平、提高光泽度、防止贝纳德旋涡。适用于溶剂型、无溶剂型及水性体系的涂料中添加。

### 物化数据及指标:

外观:无色至浅琥珀色透明油状液体

粘度(25)cs:800~1200

密度(25)g/cm3:1.03~1.04

浊点(25 1%水溶液):36~44

#### 使用方法

水性体系(水性颜料、涂料、乳胶漆、水性油墨、中性墨水):推荐用量总配方的0.3~1%

油性体系:推荐用量总配方的0.05~0.5%

无溶剂体系:推荐用量总配方的0.3~1%

在生产过程中的任何阶段加入,为了使用方便,可先用合适的溶剂稀释。

包 装: 本品包装规格为25I,200I或ibc塑桶、铁桶或按用户要求定制。

贮 运:按非危险化学品运输。阴凉干燥密封贮存。保质期12个月。

#### h-633 leveling agent

### polyether modified polysiloxane

cas: 67762-85-0

features

h-633 leveling agent is effective at low concentrations. the amount required depends on the type of formulation, provides slip, gloss enhancement, pigment treatment and leveling for ink and coatings applications. provides mar resistance for coatings applications

typical properties

appearance clear-to-hazy amber liquid

specific gravity at 25 ° c (77 ° f) 1.03-1.04

viscosity at 25 ° c (77 ° f) cs 800-1200

cloud point ° c (1%water solution):43-45

h-633 additive has been successful in these industrial applications1:

to improve leveling:

water-based (ink, industrial coating, paint) at 0.05-1% (based on solids)

solvent-based (plastic coating paint) at 0.05-0.5%

solvent-free paint at 0.3 -1%

f-333 additive can be added during the grind or let-down, or can be post-added.

characteristics may vary when used with different systems and formulations. thorough preproduction testing is necessary to ensure expected performance.

packaging & storage: 251,2001 plastic drum or ibc. store in seal drum at room, dry place, usable life 1 year.
