

得意机械 YW100自动压弯机

产品名称	得意机械 YW100自动压弯机
公司名称	张家港市得意机械制造有限公司
价格	面议
规格参数	
公司地址	塘桥镇鹿苑刘村村
联系电话	0512-58356986 13921965319

产品详情

1. 改转模为压模的弯管原理，使驱动更直接，结构更精巧。
2. 竖直方向压模弯制，大大的扩展了弯管空间。
3. 弯管过程中无需夹紧，且特别设计顶出机构、放、取管方便，弯管周期短，效率高。
4. 主要适用于弯管跨度大，或有多角度折弯的各种型材的加工。
5. 是单、双头液压弯管机系列的必要补充。 www.jsdyjx.com Machine Features: 1. The bending principle of changing the transfer mould to press mould makes the driving more directly and the structure finer. 2. The bending through press mould in vertical direction greatly expands the bending space. 3. It's designed no clamping in bending and specially with the ejecting mechanism, which enables easy taking and placing of pipes, short bending circle and high efficiency. 4. It is mainly applicable to process various sections with large bending span and multiple bending angles. 5. It is the necessarbt supplement to single and double head hydraulic bending machine.
