

大宇柴油 发动机滤清器400504-00075

产品名称	大宇柴油 发动机滤清器400504-00075
公司名称	湖南英珀威机械有限公司
价格	.00/件
规格参数	品牌:大宇 型号:400504-00075 产地:韩国
公司地址	长沙市雨花区洞井街道中意一路967号中海珑庭1#栋14层1401房
联系电话	17680155444

产品详情

公司优势：公司自创立以来,一直坚持以科技创新,精益求精为动力,坚持产品质量的高标准和严要求,按照品质求生存、服务求发展的企业原则,重合同、守信用、讲诚信,结合先进的工艺技术和测试手段,深得各界的信赖和支持。公司售后服务网络齐全、服务快捷、反应迅速,是国内柴油发电机组 船舶海洋工程 工业自动化系统的有实力也具水准的供应商与服务商。日昕人将致力未来,在市场的大熔炉中勇于锤炼自己,求真务实办实事、精益求精抓质量、坚守诚信求发展,在社会各界客户的大力支持和帮助下,日昕赢得了广阔的市场发展空间和机遇。日昕动力以质量为保障,以信誉求生存,为客户提供一条龙的“贴心”服务。过去的业绩属于成长的历史,永恒的魅力在于开拓未来。我们吸取世界经营理念之精华,期望与中外企业、和各界同仁真诚合作,携手并进,实现互惠双赢,共创美好未来。

Company advantages: since its establishment, the company has been adhering to scientific and technological innovation, excellence as the driving force, adhere to high standards and strict requirements of product quality, according to the quality of survival, service and development of the enterprise principles, contract, keep promise, integrity, combined with advanced technology and testing means, deeply trusted and supported by all walks of life. The company has a complete after-sales service network, fast service and rapid response. It is the most powerful and professional supplier and service provider of marine engineering automation system for diesel generator sets in China. Rixin people will be committed to the future, in the melting pot of the market courage to temper themselves, pragmatic and pragmatic, strive for quality, adhere to integrity and development, with the strong support and help of customers from all walks of life, Rixin won a broad market development space and opportunities. Rixin power to quality as a guarantee, credibility to survive, to provide customers with a one-stop "intimate" service. Past achievements belong to the history of growth, the eternal charm lies in opening up the future. We draw on the essence of world-class business philosophy, hope to cooperate sincerely with Chinese and foreign enterprises and colleagues from all walks of life, hand in hand to achieve mutual benefit and win-win, create a better future.

发电机组额定功率

发电机组额定功率的定义随运行方式（备载、常载和连续基本功率）的改变而变化，并随温升和绝缘等的不同而变化。

备载、常载和连续基本功率

备载适用于大部分紧急/备用状态，备载额定功率不允许过载。故在设计时，过载能力需考虑更多的设备成本，更多的运行成本和较大的维护工作。

备载功率。市电断电时提供备用电源，市电供电可靠，80%负载运行，每年运行时间200h。某些制造厂商用于高峰期功率补偿几乎无过载能力。

常载功率。用于无市电供电场合，可连续使用，70%负载运行，每12h允许10%过载1h，每年运行时间，负载 > 时不允许超过500h。

连续基本功率。用于长期与市电母排并联或制造厂商和发电厂基本负载要求，基本额定功率可连续运行（即70%负载运行），无过载能力。
