

Nano Silver Paste

产品名称	Nano Silver Paste
公司名称	善仁（浙江）新材料科技有限公司
价格	189000.00/件
规格参数	Brand:SHAREX color:silver place of P:shanghai
公司地址	嘉善县姚庄镇宝群东路159号 - 2二层
联系电话	021-54830747 13611616628

产品详情

Nano Silver Paste

SHAREX Nano Silver Paste is made of silver nanoparticles, which are uniformly dispersed in polar or non-polar solvent with high solid content. The silver paste can be well applied to conventional and new printing methods such as silk screen, gravure, flexography, and micro-contact printing methods. Printed fine electrodes offer bulk silver conductivity even at low temperature curing conditions, which is essential for printed electronics.

1 SHAREX Nano Silver Paste Characteristics

- 1) Nano silver particle offers excellent fine patterning with superior process capability.
- 2) Wide range of curing temperature for plastics & glass.
- 3) Conductivity is as low as bulk silver offering high conductivity even in micron scale patterned electrode.
- 4) For conventional & cutting-edge printing Technologies. (Silk-Screen, Gravure, Off-set, Micro contact printing)

2 SHAREX Nano Silver Paste Application

- 1) OLED Screen, MICRO LED, Mini LED Electrodes

- 2) RFID (Radio Frequency Identification)
- 3) FPCB (Flexible Printed Circuit Board)
- 4) EM I (electromagnetic interference)
- 5) Solar Cell
- 6) Touch screen
- 7) Other Flexible Display and Printed Electronics
