

# ABS 台湾奇美 PA-747 高抗冲通用高刚性耐化学性

产品名称	ABS 台湾奇美 PA-747 高抗冲通用高刚性耐化学性
公司名称	京冀（广州）新材料有限公司
价格	15.80/千克
规格参数	ABS:高抗冲 PA-747:高刚性 台湾奇美:耐化学性
公司地址	广州市南沙区丰泽东路106号（自编1号楼）X130 1-E014087（注册地址）
联系电话	18938547875 18938547875

## 产品详情

Taiwan chimei ABS 765 high mobility fireproofing V-0 Taiwan chimei ABS 758 high transparency, taiwan chimei ABS 727 good electroplating (applicable to all need electroplating decorative accessories button) Taiwan chimei ABS 709 ultra-high impact strength, good low temperature resistance, taiwan chimei ABS 756 high fluidity, high rigidity, high gloss, Taiwan chimei ABS 763 high fluidity, fireproofing V-0 Taiwan chimei ABS 764 light resistance, heat resistance, fireproofing V-0 Taiwan chimei ABS 764B light resistance, heat resistance, fire resistance, V-0 anti-aging, Taiwan chimei ABS 765A high flow, v-0 Taiwan chimei ABS 765B medium impact resistance V-0 Taiwan chimei ABS 766 high impact resistance V-0 Taiwan chimei ABS 767 high impact,

extruded products. For coating, it is suitable for extruding and forming Taiwan Chimei ABS heat-resistant class PA-777B, Super heat-resistant Class 777D, Super High heat-resistant Class 777E; Taiwan Chimei Abs CS, 756HR, 747F, 747S, Japan Toray ABS v Korea LG ABS, xR-409H ultra-high heat-resistant class (electrical products, automotive engine accessories) . Korean LG ABS, AP-163 anti-static grade Korean LG ABS, AF-312, AF-312C, AF-312T fire resistance v0; American GE ABS, FR15U fire resistance UV; American GE ABS, FR15 Fire Resistance; American GE ABS, MG47 high impact, uS Ge ABS, MG47MD, HMG47MD medical grade Chinese name: ABS Plastic, foreign name: Alkyl Benzo sulfonate chemical name: \* \* \*-butadiene-ethylene plastic

Abs Plastics: flame-retardant ABS, reinforced ABS, reinforced flame-retardant ABS, heat-resistant ABS, electroplating ABS, PC/ABS alloy, according to the impact strength, electroplating PC/ABS can be divided into ultra-high impact type, high impact type, middle impact type and so on, can be divided into: injection, extrusion, calendaring, vacuum, blow molding and other varieties; ABS according to the use and performance characteristics, can also be divided into: General class, heat-resistant class, plating class, flame retardant class, transparent class, anti-static, extrusion plate class, pipe class and other varieties of ABS Properties: \* \* \* to provide heat resistance and resistance, butadiene provides toughness and impact resistance, ethylene provides stiffness and processability.
