

重庆西门子授权代理商通讯电缆

产品名称	重庆西门子授权代理商通讯电缆
公司名称	浔之漫智控技术（上海）有限公司总部
价格	5200.00/件
规格参数	品牌:西门子 货期:现货 产地:德国
公司地址	上海市松江区石湖荡镇塔汇路755弄29号1幢一层A区213室
联系电话	15021292620 15021292620

产品详情

重庆西门子授权代理商通讯电缆

荆门西门子PLC模块授权一级代理商，湖北西门子电线电缆授权代理商，上海西门子S7-200CPU系列代理商，西门子

S7-1200CPU系列代理商，SIEMENS西门子模块授权一级代理商,西门子SIEMENS低压断路器一级供应商，西门子低压断路器

代理商，西门子S7-500系列代理商

优势

As well as consumption, the devices indicate the instantaneous power, thus providing an overview of plant capacity utilization at all times and saving additional measuring devices into the bargain.

Suitable for an almost unlimited range of applications: 7KT PAC1500 measuring devices for direct connection, 63 A for small plants and up to 5000 A with transformer for large plants.

7KT PAC1200 Measuring Devices

概述

The 7KT PAC1200 multichannel current measuring system is a low-cost solution for the transparent representation of energy consumption. The current values themselves are measured by means of sensors that are fitted above the miniature circuit breakers. The simple cost center allocation enables maximum transparency over the entire application.

Scalability

The 7KT PAC1200 multichannel current measuring system monitors and displays the energy consumption of up to 96 outgoing feeders. A maximum of eight times twelve sensor bars can be configured, always eight bars with the respective combination. Up to eight different, selectable consumption sources can be compared with each other. The system can be scaled to individual needs and application scenarios. The individual sensors can be named individually and compared with each other. The system can be configured flexibly as the number of sensor bars can be varied.

Consumption statistics

The statistics shows the overall consumption of selected sensors. The consumption can be shown both in euros and in kWh. The results can be displayed in the form of a pie chart or a bar chart, depending on selection. The periods that can be selected are as follows:

Days

Weeks

Months

Years

Both the overall consumption and the individual consumption of a sensor can be displayed.

It is also possible to generate a history so that any deviations can be investigated. To do this, select a date using the button below the chart.

7KT PAC1200 multichannel current measuring system installed in ALPHA 400 distribution board

优势

Measurement of individual feeders – thus direct comparison of consumers

Detection of current peaks – thus avoidance of high energy costs

Web server and app representation – thus plug-and-play visualization of measured values and consumption values

Scalability – thus number of measuring points can be adjusted to size of the power distribution system

1 GB internal memory – thus long-time data recording over one year possible

应用

Use cases

Energy measurement on

Strip lighting

Production machines

Motors

Fields of application

Carpenters' and joiners' workshops, locksmiths' shops

Large bakeries, breweries, slaughterhouses

Municipal utilities

Banks, etc.

Application example of a brewery
