choosing an ideal solar mounting system is an important part the installation.the objective is a solidly mounted roof hook that will last for many years and withstand all kinds of weather.

china qingdao six brother metal products co., ltd provide you the products:1 speical desinged for solar water heater or solar panel on the roof.2. solar roof hook features an enormous load capacity.3. state-of-the-art production processes guarantee the cost-efficient manufacturing of the roof hook.4. well and high quality control5. easy to install6. we also provide oem manufacture service.

these substantial stainless steel brackets are used to secure the mounting rails to the roof beams. these are suitable for

tiled roofs only, but versions for slate roofs and sheet metal roofs are also available, please ask.

to fit, a few tiles are removed from the outside of the roof and the hook secured to a rafter pointing "downhill" with the tek screws provided. plywood padding can be used to ensure the correct spacing from the tile surface. the tiles are simply replaced around the hook ensuring a weatherproof finish.

each rail will need a roof hook within 0.8m of each end, and further hooks at no more than 2m intervals in between.

like the rest of the system, the stainless fixings attaching the roof hooks to the mounting rails can be tightened one-handed. china qingdao six brother metal products co., ltd tel: 86-532-83356280
