The ultimate in Reference Series performance, the RF-7 II tower speaker lets you experience the true power, detail and emotion of cinematic spectacles and concert performances from the comforts of home.

Flagship Reference Series model ideal for discerning audiophiles

Fills large rooms with movie theater/concert quality sound

Uncovers every subtle nuance of your content

Highly efficient design produces more output using less energy

Accurate, non-fatiguing sound provides hours of listening pleasure

Plays louder with less distortion than the competition

Dynamic 1.75" titanium horn-loaded tweeter, dual 10" high-output woofers

Dimensions: 48.5" H x 11.6" W x 16" D

Beautiful furniture-grade wood veneer cabinet

The RF-7 II is complete with our proprietary Tractrix® Horn technology which produces a unique combination of precision, clarity and effortless power. Finished in a beautiful medium cherry or black furniture-grade wood veneer, the RF-7 II is guaranteed to complement any d é cor.

New and Improved

Now in its fifth generation, Reference II speakers boast enhanced features, including re-engineered drivers and a new crossover system, to capture your attention and excite your emotions. In addition to the improved sound quality, the look of “ big sound ” has been redefined throughout the line with sophisticated cabinetry, refreshed logos and rounded feet.

Four Laws of the Klipsch Universe

Beginning in 1946, company founder, Paul W. Klipsch believed four principles to be the foundation for great sound. Together, these four design principles—high efficiency with low distortion, controlled directivity, flat frequency response, and wide dynamic range—have and always will be the foundation for our stunningly powerful and precise sound.

Tips and Tricks

For helpful tips and additional speaker information visit our online FAQs.

Features

Every Reference speaker utilizes our Tractrix® Horn technology for lifelike sound, more output using less energy, improved reliability, reduced distortion and a large soundstage with well-defined imaging.

Our light, yet rigid Cerametallic woofer cones feature specially treated aluminum to help better dampen and prevent distortion.

Titanium tweeter with linear travel suspension—trickle-down technology from our flagship Palladium Series—provides an open, natural sound, making you feel as if you 're in the studio with the recording artist or on the set of a film.

Rounded feet offer less protrusion, giving the cabinet a slimmer, more sophisticated look with new copper accents.
