

造纸制浆脱墨浮选设备 福建轻机

产品名称	造纸制浆脱墨浮选设备 福建轻机
公司名称	福建省轻工机械设备有限公司市场营销部
价格	.00/个
规格参数	是否提供加工定制:是 品牌:福建轻机 型号:ZFC系列
公司地址	中国 福建 闽侯县 铁岭工业区
联系电话	86 0591 22079888 18859150357

产品详情

是否提供加工定制：是
用途：造纸制浆脱墨

品牌：福建轻机
别名：叠形浮选槽

型号：ZFC系列

application:it is designed to remove hydrophobic impurities such as ink particles, gooey, plastics or padding in waste paper stock.design features:it ' s able to remove a wide range of ink particles with sizes of 5 to 500 micra.it is designed with a built-in aeration component in favor of the process gas loop.owing to the reasonable combination of the troughs, it is easy to control fluid level, which results in reliable operation and a wide rangeof capacity.two-stage flotation system (first stage plus second stage) guarantees the maximum removal of the impurities such as ink particles aswell as the least loss of the fiber.two-stage flotation system (front stage plus back stage) isarranged in cascade and less space is required.用途：用于除去废纸浆中的疏水性杂质，如油墨颗粒、胶粘物、塑料、填料等。结构特点：能够去除油墨颗粒的尺寸范围大，大约5~500微米。内置式曝气元件，有利于工艺气体回路封闭。槽体间组合合理，液位控制简单，运行可靠，产量范围大。两段浮选系统(一段+二段)确保最大限度地去除油墨等杂质的同时，保证纤维流失最小。两段浮选系统(前段+后段)层叠布置，占地面积小
