

新疆西门子触摸屏代理一级总代理

产品名称	新疆西门子触摸屏代理一级总代理
公司名称	上海跃韦科技集团有限公司
价格	.00/件
规格参数	西门子:西门子PLC模块.电机代理 全系列:西门子变频器通讯电缆代理 德国:西门子触摸屏DP接头代理
公司地址	上海市金山区吕巷镇溪北路59号5幢（三新经济小区）（注册地址）
联系电话	15821196730 15821196730

产品详情

西门子SMART7寸触摸屏中国有限公司代理商

SICAM FCG - Gateway for short circuit indicators

Description - SICAM FCG

Gateway for short circuit indicators

The SICAM Fault Collector Gateway (FCG) device receives both the load current values and distribution line faults via the SICAM Fault Sensor Indicator (FSI). The received information status and events are transmitted to the control center based on the IEC 60870-5-104 protocol or to the Siemens FLiC service using the XMPP protocol. The fault detected by SICAM FSI is communicated to SICAM FCG via short-range radio (SRR) communication within a distance of 100 meters. SICAM FCG provides 6 binary inputs and 3 binary outputs. SICAM FCG can be configured and diagnosed locally using the Web GUI by connecting to a PC or laptop computer or remotely via General Packet Radio Service (GPRS). The SICAM FCG has a plastic housing and it is strongly recommended to mount it within a metal cabinet for additional protection. The bal System for Mobile Communications (GSM) and short-range radio antenna are mounted outside the metallic cabinet. SICAM FSI firmware and parameters can be updated from the SICAM FCG. SICAM FCG Web GUI allows you to configure the parameters, display error and event log, upgrade of firmware, and download the configuration.

Product homepage - downloads in the internet (catalogs, certificates, firmware, manuals):

优势

High availability - reduced downtime

Quick fault detection – exact fault localization and information to maintenance teams
