## 韩国KOBA蓄电池MF100L 启动功率 12v100AH电源

| 产品名称 | 韩国KOBA蓄电池MF100L 启动功率<br>12v100AH电源 |
|------|------------------------------------|
| 公司名称 | 狮克电源(山东)有限公司                       |
| 价格   | 200.00/只                           |
| 规格参数 | 品牌:KOBA<br>型号:MF100L<br>产地:韩国      |
| 公司地址 | 北京市昌平区沙顺路88号                       |
| 联系电话 | 13240167779 13240167779            |

## 产品详情

韩国KOBA蓄电池MF100L 启动功率 12v100AH电源韩国KOBA蓄电池MF100L 启动功率 12v100AH电源韩国KOBA蓄电池MF100L 启动功率 12v100AH电源韩国KOBA蓄电池MF100L 启动功率 12v100AH电源

KOBA深循环电池是一种全能或"室内"电池。凭借骑行和启动能力,它们是各种船用和娱乐车辆应用的电池。efb是一个改进的过程(在smf上),以便对发射过程做出非常快速的响应,对于像马自达这样使用启停技术的车辆和现在的运营商来说。EFB不仅用于现代汽车,而且还可用于比传统更具时间和耐力的流行车厢。

电池充电器UPS非常重要的一部分,电池的充电条件对电池寿命有很大影响。如果电池一直处于恒压或"浮"型电器充电状态,则UPS 电池寿命能较大程度提高。事实上电池充电状态的寿命比单纯储存状态的寿命长得多。因为电池充电能延缓电池的自然老化过程,所以UPS无论运行还是停机状态都应让电池保持充电。Battery charger UPS is a very important part of the battery, and the charging conditions of the battery have a significant impact on the battery life. If the battery is always in a constant voltage or "floating" electrical charging state, the UPS battery life can be greatly improved. In fact, the battery life in the charged state is much longer than that in the pure storage state. Because battery charging can delay the natural aging process of the battery, UPS should keep the battery charged both during operation and shutdown.
