2015年11月22日至11月30日，中电元协与工业4.0的三大推动机构之一、欧洲的应用科学研究机构——德国弗劳恩霍夫应用研究促进协会（Fraunhofer-Gesellschaft）共同组织了“2015年中国电子元件行业协会德国工业4.0培训考察团”，并圆满完成了各项培训考察任务。

Thunder Precision Resistor Co. is a 20 years experienced professional manufacturer of high precision resistors and ultra-

precision resistors , the all production is strictly controlled and follows an extensive set of instruction established in production procedure for reproducibility which was introduced from Europe in 1988 with USD400 , 000.00.

盛雷城依托人才优势，黄金开发区精密电阻，重视产品的开发和技术，在精密电阻产品的精度、稳定性、温度系数以及特殊行业的应用上均有独到的优势，UPR精密电阻0.05%，另外针对客户的个性化需求，公司有极强的反应能力，及时提供有针对性的产品，UPR精密电阻0.1%，满足客户的需求。公司生产的高精密模压电阻具有精密高温系数低稳定性能好等特性。

High stability , high reliability , ultra high precision , UAR精密电阻0.05% , lower TCR.these are all the characteristics of the mold type resistors which manufactured by Thunder Precision Resistors , also called black resistors , EE resistors.Thunder Precision Resistors adopted advanced production process and material from European and American. We provide high requirements EE series of mold type resistors which also named black resistors with high stability and reliability and very lower TCR. for high precision instruments and precision electronic balance weighing apparatus and other production enterprises.

盛雷城精密电阻有限公司将采用光纤激光器刻槽机，替换现在使用的掺钕钇铝石榴石（YAG）激光刻槽

机，大规模开展设备更新升级改造工程，

Thunder Precision Resistor Co. , Ltd. Has been starting equipment upgrade program. Fiber laser trimming systems will rece

all the YAG laser and simi-conductor laser.

Fiber laser is the most stabilized laser system that will increase the quality of the groove on the resistors so that the stability of the resistors will be increased accordingly.

Thunder Precision Resistors makes high precision and ultra precision resistors and ultra precision resistor networks with really high stability and reliability already!
