

# 维谛艾默生UPS不间断电源UHA1R-0030稳压服务器3KVA/2700W标机

产品名称	维谛艾默生UPS不间断电源UHA1R-0030稳压服务器3KVA/2700W标机
公司名称	山东鹏畅新能源科技有限公司
价格	.00/件
规格参数	品牌:维谛 艾默生 型号:UHA1R0030 货源类别:现货
公司地址	山东省济南市历下区工业南路
联系电话	15066660575 18801309060

## 产品详情

维谛艾默生UPS供电蓄电池的使用环境以及维谛UPS电源购买渠道方式艾默生UPS配套电池的使用寿命与环境温度密切相关，电池处于较低温度时，蓄电池中的锌板容易粉化，失去蓄电性能，造成\*\*性损坏;温度过高时，电池的容量也会下降，情况严重时会造成\*\*性损坏。根据电池生产厂家的技术规范，电池的\*使用温度是2~25 ，在该温度范围使用，可延长电池的使用寿命。

总之，做好UPS蓄电池的维护工作，可以减少UPS的故障，提高系统运行的稳定性。通过对电池的维护可以提高电池的使用寿命。

如有需要请到山东鹏畅正规渠道购买，质量保证，\*\*保障，请放心购买

The usage environment and purchasing channel of Viti Emerson UPS power supply batteries are closely related to the environmental temperature. When the battery is at a lower temperature, the zinc plate in the battery is prone to pulverization, losing its storage performance, and causing permanent damage; When the temperature is too high, the capacity of the battery will also decrease, and in severe cases, it can cause permanent damage. According to the technical specifications of the battery manufacturer, the optimal operating temperature for batteries is 2-25 . Using within this temperature range can extend the battery's service life.

In short, doing a good job in the maintenance of UPS batteries can reduce UPS failures and improve the stability of system operation. By maintaining the battery, the service life of the battery can be improved.

If necessary, please purchase from the legitimate channels of Shandong Pengchang, with quality assurance and genuine product guarantee. Please feel free to purchase with confidence
