

# DAIKIN聚四氟乙烯POLYFLON 日本大金 PTFE DAIKIN INDUSTRIES

产品名称	DAIKIN聚四氟乙烯POLYFLON 日本大金 PTFE DAIKIN INDUSTRIES
公司名称	宁波市时锦塑料有限公司
价格	.00/件
规格参数	种类:PTFE 性能1:低摩擦系数 性能2:耐热性
公司地址	余姚市中国塑料城中心交易区F区22楼
联系电话	021-51619876 18668803991

## 产品详情

### DAIKIN聚四氟乙烯POLYFLON 日本大金 PTFE DAIKIN INDUSTRIES

Nippon Daikin is a professional manufacturer of high performance materials with rich experience and technology in the field of PTFE. PTFE stands for polytetrafluoroethylene, a very corrosion resistant, high temperature resistant, low coefficient of friction material, which is widely used in chemical, medical, electronic, and aviation fields.

Daikin's PTFE products mainly include PTFE film, PTFE tube, PTFE sheet, etc. Among them, PTFE film has excellent corrosion resistance and high temperature stability, which can be used to prepare capacitors, diaphragms, etc.; PTFE tube has excellent chemical resistance and low friction coefficient, which can be used to transport corrosive media; PTFE sheet has excellent temperature resistance and mechanical strength, which can be used to prepare sealing gaskets, bearings, etc.

In addition to traditional PTFE products, Daikin Japan has developed a series of functional PTFE products, such as conductive PTFE and antistatic PTFE. Conductive PTFE has electrical conductivity while maintaining the excellent properties of PTFE, and can be used for the preparation of electronic components; antistatic PTFE has antistatic properties and can be used for the preparation of antistatic materials.

In short, Daikin's PTFE products have a wide range of application prospects and market potential, and are a high-performance material with excellent performance.
