产品详情

A/B series metal nozzles feature a hollow cone spray pattern with a ring-shaped impact area and spray angles of 51 ° to 144 ° .

they produce small to medium sized drops at a wide range of flow rates and pressure.

A/B metal nozzles are ideal choice for applications requiring good atomization of liquids at lower pressures or when quick heat transfer or effective airborne droplet impingement is required.

A/B metal nozzles have special whirlchamber , they feature large and unobstructed flow passages , which minimize or eliminate clogging.
